

Sprint 3 Initial Planning

Start Date: 2/15

End Date: 3/7

Backlog items from Sprint 2:

- Migrate all the current implementation from ECS to Object-Oriented (Evan's state machine)
- Get all link data

Task Planning (Big picture):

More detailed task planning: <https://www.notion.so/Task-Universe-18c0992c88eb80dc892cd4ed2feed39b?pvs=4>

Tasks

 Complete Sprint Three	Sprint 3
 Complete Rocket Projectile	Sprint 3
 Implement collisions for Rocket into game	Sprint 3
 Make Items throwable or usable by characters	Sprint 3
 Make Items pickupable by characters	Sprint 3
 Implement animations of Rocket into Game	Sprint 3
 Get animations for Rocket item	Sprint 3
 Create Items System	Sprint 3
 Implement Mario's Fireball	Sprint 3
 Create Projectile System	Sprint 3
 Level Loader pt2	Sprint 3
 Level Loader pt1	Sprint 3
 Have animations match with attacks (collisions)Deve	Sprint 3
 Have input controllers accurately match animations	Sprint 3
 Implement keyboard Mappings so that same function triggers for both consol...	Sprint 3
 Be able to toggle through property where character could pass through terrai...	Sprint 3
 Create a System for terrain/blocks to form platforms or something	Sprint 3
 Implement Collision data for Mario Attack(weapon)	Sprint 3
 Implement Collision data for Link Attack(weapon)	Sprint 3
 Implement Collision data for Mario Character	Sprint 3
 Implement Collision data for Link Character	Sprint 3
 Write documentation on how to implement Collision data into XML	Sprint 3
 Create an system for Collision that is DATA-DRIVEN	Sprint 3
 Add unnecessary files to the ignore	Sprint 3
 Cleaning up Evan's code	Sprint 3
 Implementing data for Mario so it works with Evan's State machine	Sprint 3
 Implementing data for Link so it works with Evan's State machine	Sprint 3
 Having key mappings for Player One and Player Two	Sprint 3
